

Ingham County Request for Proposals

Architectural and Engineering Services for Asphalt Parking Lot Replacement

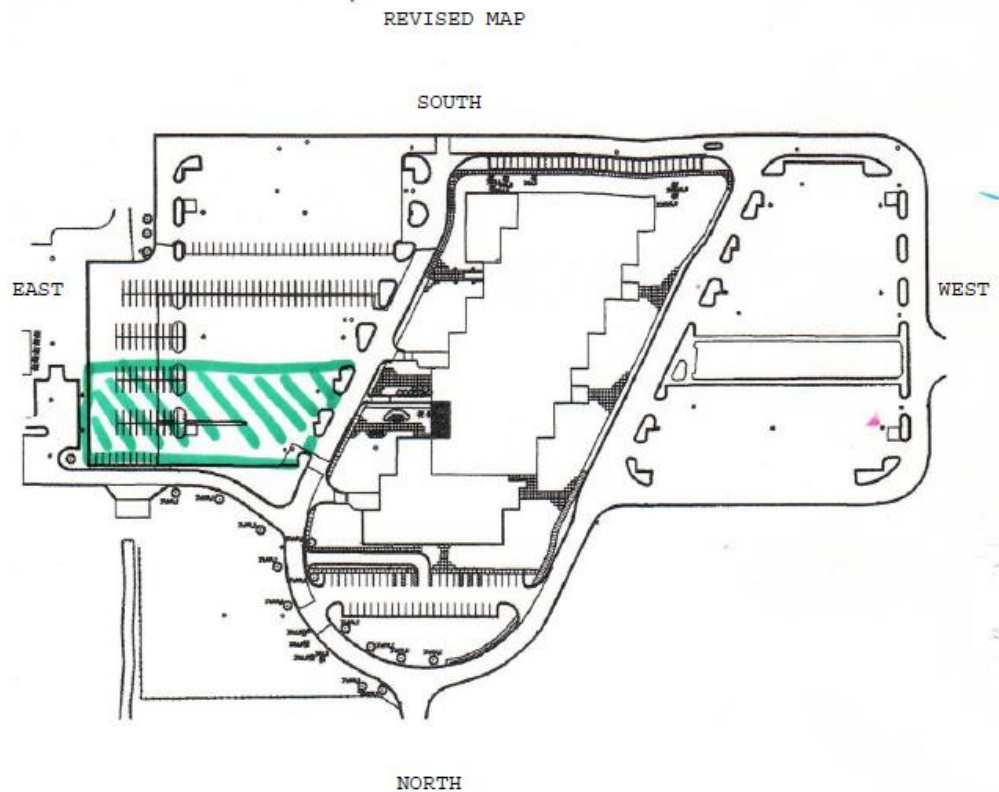

Packet #19-19

ADDENDUM NO. 1

The following clarifications, modifications and/or revisions to the above project shall be considered a part of the original specifications:

- 1) The area [Human Services Building] shown on the map (last page) for paving improvements 'overlaps' the area that was part of #19-18. Did the area shown in this year's 19-19 not get designed as part of 19-18? I've attached the 19-18 map for reference.

Answer: Yes, it does overlap. See the current map for this project below and attached.

- 2) Are soil boring completed within the design area? Will the borings logs and geotech report for this area be made available to the selected firm?

Answer: There hasn't been any issues up to this point; therefore, we do not anticipate the need for this last phase. If needed it will be Ingham County's expense.

- 3) Has a topo survey been completed within the design area? Will the topo survey for this area be made available to the selected firm?

Answer: The only topo survey available for the Human Services Building dates back to 1984; nevertheless, it can be made available to the successful contractor upon request.

- 4) Will plans of previous phases be available to the selected bidders for review and to promote a cohesive overall project?

Answer: Yes

- 5) Has a survey been completed for the Human Service Building and Ingham County Visitor Parking lots that will be available to the consultant for design?

Answer: No

- 6) Are pavement cores and soil boring required of the pavement and base condition assessment?

Answer: No

- 7) If so, have pavement cores and soil borings been completed for either of the lots that will be available for pavement evaluation?

Answer: No

- 8) Are there any changes in circulation or layout desired?

Answer: No

Please acknowledge your receipt and understanding of the aforementioned Addendum by signing below and returning it with the submittal of your proposal.
